

How To Access Benchmark Trend Reports

Important Information about SPOT Reports

SPOT Reports are available for Arkansas Benchmark Examinations and Arkansas End-of-Course Examinations taken by students since the 2004 – 2005 school year. All reports are for Combined Population, meaning that all students who moved into a districts or a school after October 1 the year the test was administered, are not included in the data.

Data was obtained from the Arkansas Department of Education website at <http://www.arkansased.org>

Reports may contain data from schools that did not have students enrolled in the grade levels tested in specific years. This means that some school reports will not have data for all grades in all years. The reports may also include data from districts and schools that are no longer in operation due to consolidation or reorganization.

The Learning Institute observes the Arkansas Department of Education minimum group size reporting limits. This means that districts or schools with less than 10 students tested on any assessment during any year are not reported to protect the confidentiality of student achievement information.
